

Clearing Browser Cache

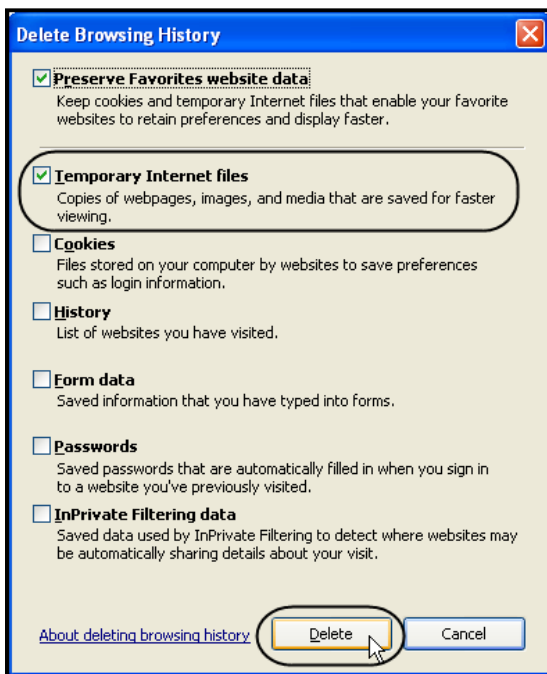

An effective way to improve the performance of your computer is to clear your browser's cached files. Web pages, images and downloaded content from the internet is referred to as cache. Browsers store these items to make using the internet appear faster. A build-up of these files can significantly affect the performance of the internet on your computer. The process to clear the browser cache is slightly different for each browser. Below are the steps to clear the cache for the five (5) Paragon supported browsers.

Internet Explorer 8

- Step 1** Open your Internet Explorer browser.
Step 2 Click **Tools** > **Delete Browsing History**.

- Step 3** Click **Temporary Internet Files**.

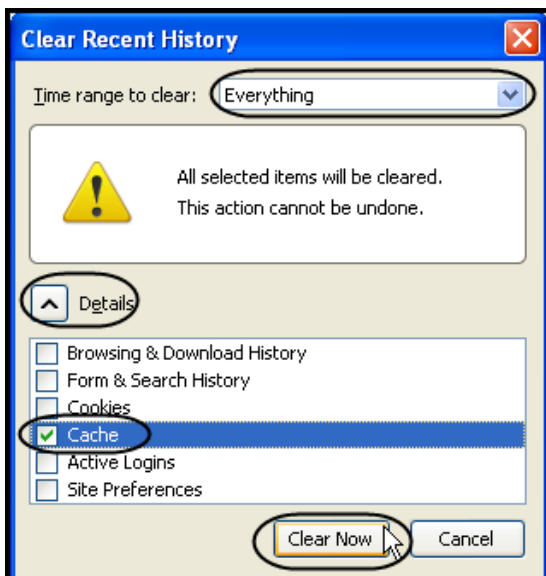

- Step 4** Click **Delete** to clear the cache for Internet Explorer.

Firefox 3.5 and up

- Step 1** Open your Firefox browser.
Step 2 Click **Tools** > click **Clear Recent History**.

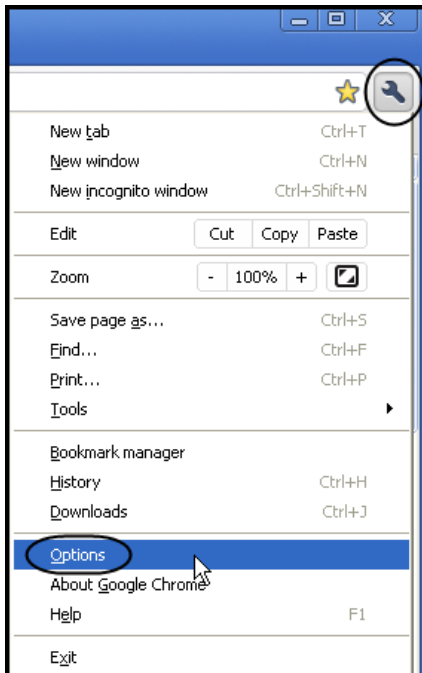

- Step 3** In *Time range to clear*, Click **Everything** > Click **Details**. Check or uncheck the boxes so only **Cache** is checked. Click **Clear Now** to clear the cache for Firefox.

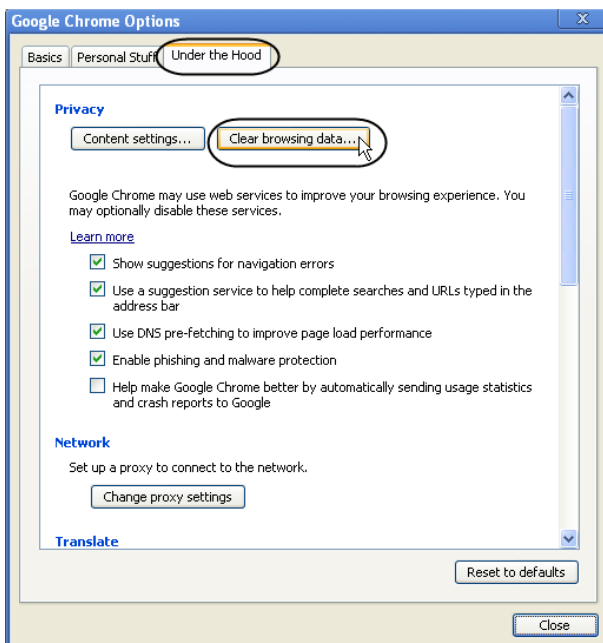

Google Chrome

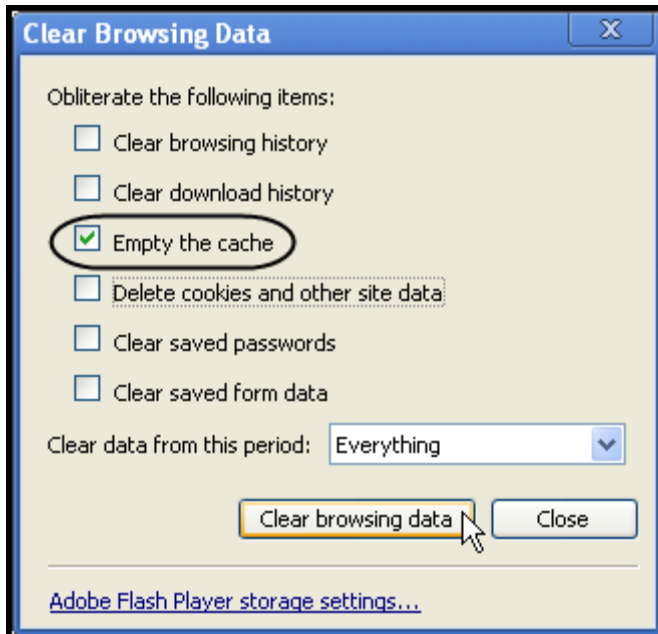

- Step 1** Open your Google Chrome browser.
Step 2 Click the **Wrench (Tools)** > click **Options**.

- Step 3** Click the tab **Under the Hood** > click **Clear Browsing Data....**

Step 4 Check and uncheck boxes so only **Empty the cache** is checked > Click **Clear the browsing data**.

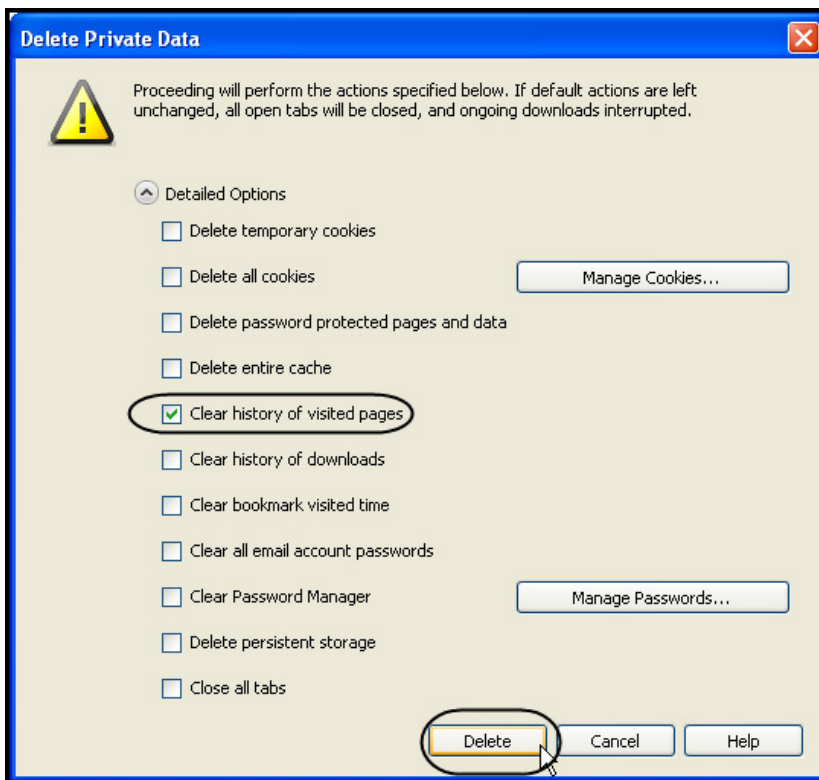

Opera

- Step 1** Open your Opera browser.
Step 2 Click **Tools** > click **Delete Private Data...**

- Step 3** Check or uncheck boxes so the **Clear history of visited pages** is checked > click **Delete**.

Safari

Safari for Mac OSX

- Step 1** Open your Safari browser.
- Step 2** Click **Safari** > click **Empty Cache**.

- Step 3** Click **Empty**.

Safari for Windows

- Step 1** Open your Safari browser.
- Step 2** Click **Edit** > click **Empty Cache**.
